## 01 PROFILE

*Task driven and methodical Factory Worker with eight years' hands-on experience in parts assembly of auto mechanical equipment. Has a proven track record of attaining a 100% product feed score for the last 28 weeks. Competent at adhering to OSHA workplace safety regulations and attained a Certified Mechanical Technician as well as Certified Welder qualifications in the last six months.*

## 02 EMPLOYMENT HISTORY

01/2019 — Present

### **Food Factory Worker at ABC Sweets and Confectionary**

Denver

*Enhanced the finished product's quality by conducting vigilant manual scanning at three stages of the production process instead of just the final stage resulting in defective ratio's dropping by 34%.*

- Signal co-workers to guide them regarding the placement of pallets containing baking products such as flour, sugar, oil, and powdered eggs to be used during production and processing.
- Prepare raw materials for mixing and processing
- Conduct minor repairs to equipment and machinery such as replacing worn components or fixing damaged mechanical parts
- Position spouts and chutes of raw material storage bins so that food ingredient containers can be filled for automated mixing and processing to take place
- Clean and sanitize work areas, equipment, and machinery after each shift
- Deconstruct defective food products for reprocessing
- Ensure a constant supply of ingredients to be fed through to the mixing and processing machinery via the conveyor systems
- Operate machinery such as slicers and cutters when the machinist is on a break

09/2016 — 12/2018

### **Textile Factory Worker at Borning Textiles and Garments**

Cambell

*Decreased machine shutdown cycles by 40% by increasing preventative maintenance schedules from once a month to one a week during factory downtimes.*

- Operate looming, knitting, braiding and looming machinery on a rotational schedule

- Carry material pallets containing fabric and threads to the designated work stations
- Fetch tools such as needle threaders, scissors and die mixing components from the storeroom
- Program and calibrate industrial sewing and weaving machinery
- Conduct preventative maintenance activities to ensure machinery remains in proper working order
- Feed cloth and fabric into die buckets
- Adjust color components in the die mixers according to process specification orders
- Feed fabric into sewing machines and sew garments according to predetermined production specification
- Conduct finishing duties such as cutting off loss threads, operating iron presses and affix buttons and hooks
- Select and tag finished garments and load them onto conveyor belts

### **03 EDUCATION**

---

Jul 2018 — Jul 2019

#### **The International Society of Automation**

*Triangle Park*

ISA Certified Automation Professional (CAP)

Jan 2017 — May 2017

#### **Manufacturing Skill Standards Council**

*Alexandria*

Certified Production Technician (CPT)

Oct 2016 — Nov 2016

#### **American Testing College (ACT),**

*Iowa City*

National Career Readiness Certificate

Dec 2013 — Dec 2015

#### **West Side High School**

*Charlotte*

GED Diploma

## 05 INTERNSHIPS

---

Oct 2015 — Dec 2015

### In-Service Apprentiship at Aromax Chemicals

Louisville

*Part of the line achieving a hundred percent of quality standards with no products being flagged for defects by the quality control department and still exceeding production targets by 130%.*

- Monitor pumps, valves and gauges to regulate the flow of liquids and air
- Mark and tag identification on parts of the boilers and steamers to indicate the ones requiring maintenance or replacement
- Dump materials such as organic chemicals and raw materials into machine hoppers before mixing and processing takes place
- Mix raw materials according to specified procedures or formulas before extrusion and extraction are to begin
- Record information of products tested, meter readings on machinery and dates and times of processing activities
- Review charts and gauge readings and compare with standard safety numerical values to determine that they are operating in the designated safety ranges according to OSHA
- Measure and grade products coming out of the feeding batches in comparison to standard specifications and quality standards
