Physics

SolidWorks

Autodesk Revit

Profile

Technically orientated Mechanical Engineer with over six years experience in reliability and maintenance activities within a clean room environment. Highly adept with mechanic supporting sanitation systems and equipment. Completed a Masters Degree in Thermodynamics and holds a Professional Engineering license.

Employment History

Mechanical Engineer III , Zimmer Medical Devices

May 2018 – Present Fort Lauderdale

Responsible for reliability testing of more than 30 pieces of outdated machinery and improved their efficiency by 70% with minor design tweaks.

- Test CNC machinery and equipment to ensure they function correctly and schedule preventative maintenance activities
- Coordinate reliability testing and devise planned maintenance schedules to coincide with commissioning activities
- Facilitate the safe testing and commissioning of all high voltage machinery and equipment
- Make sure all PLC are tested and maintained according to the operational requirements of the plant

Mechanical Engineer II, Corneing Thermodynamics

Jan 2017 – May 2018 Tewksbury

Part of the product development team that conceptualized more than 15 thermal devices in the last quarter and received a 100% pre-approval rating for all prototypes presented.

- Support the entire production process regarding quality inspections and cost improvement initiatives.
- Collaborate with mechanical packaging-designers and electrical engineers to define upcoming projects in terms of timeframes, financial resources, and allocation of labor
- Create 2D and 3D schematics and drawings on Solidworks and AutoCAD
- Monitor project progress, record test results, write quality reports and submit to senior engineer for final approval

Mechanical Engineer I, Confluence Devices

Jan 2016 – Dec 2016 Borger

Improved the undisrupted equipment reliability by adding two extra planned maintenance schedules per quarter resulting in zero shutdowns due to machine failures in the last 12 months.

- Design product concepts, build prototypes and conduct testing and validation on Class I medical devices

Product Testing

Thermodynamics

Pneumatics

Quality Control

Coding

Data Assimilation

Autocad

Python

Languages

English, Russian

- Establish ongoing relationships with potential overseas private equity firms to secure funding for commercialization of pilot products
- Interact with potential manufacturers and create proposals to set up assembly lines, packaging requirements and production specifications
- Define product specifications, wrote inspection and testing manuals and draft failure analysis reports
- Propose design improvements and redesign suggestions to the product development team to correct problems with prototypes

Education

National Council of Examiners for Engineering and Surveying (NCEES),
Professional Engineering (PE) Exam,

Jun 2019 – Jun 2019  Seneca

University of North Carolina, Doctor of Philosophy in Mechanical
Engineering

Jun 2019 – Present  Charlotte

Thesis Topic: Micro-electromechanical systems design and design optimization in Class II
Medical Device applications

The International Association for Plumbing and Mechanical Inspectors,
Certified Mechanical Inspector,

May 2017 – May 2017  Los Angeles

Society for Manufacturing Engineers, Certified Manufacturing Engineer

Jan 2016 – Jun 2016  Deerborn

University of Minnesota, Master of Science: Mechanical Engineering,

Jun 2015 – Jun 2017  Minneapolis

University of Minnesota, Bachelor of Science: Mechanical Engineering

Jun 2011 – Jun 2014  Duluth

GPA of 3.75

Curriculum: Mechanics of Materials, Visual Thinking, Mechanical Systems Design.
Thermodynamics

Courses

Advanced Civil 3D and Reality Capture, CAD Masters Inc., Sacramento

Sep 2018 – Nov 2019

3D, Revit and Navisworks Course, Applied Software Training Center,
Atlanta

Jul 2016 – Aug 2016
