Matt Griffin, Welder

1515 Pacific Ave, Los Angeles, CA 90291, United States, (541) 754-3010, email@email.com

EMPLOYMENT HISTORY Jan 2020 — Present Marine Welder, Gulf Coast Shipping Yards Interpret designs, monitor machiners, and pre-assess components to be welded Identify, locate and prepare fixtures and tools before performing welding operations Repair standard and non-standard flaws in sheet metal components Use gauges and drawings to ensure compliance with quality and safety specifications Perform welding with close tolerance to finishing requirements of standardized parts Do pre-assessments and post-inspections on all welded parts Cutting of new tools and fixtures with high specialized welding and cutting machinery Welder, International Shutdown Services Worked on an Industrial Shutdown Project and finished all cutting, welding and brazing tasks six weeks also shedule Interpret schematic CAD drawings and blueptints for mega steel structures in the construction ind Conduct appropriate fabrication and layout of items to ensure proper structuring of sactivities for evelding connection Use FCAW and MiG welding machines to fuse together aluminum and stainless steel pieces Test all welds to ensure stability and detectify Repair weakened steel structures and beams with an Arc Welding machine May 2020 — May 2020 Adviced a record of zero defects in all pipe-welding and ductwork jobs in the last 18 months Solder and braze stainless steel piping structures Make minor adjustments to finished parts to conform to the safety and regulatory specifications Carefully inspected all finished parts to ensure compliance with all regulations, making adjustment repairs as needed with SMAW welder Adminis	Place of birth	San Antonio Driving license	Ful		
PROFILE Wellenured Are Welder with five years experience in fabricating quality metal components for the shipping marine sector. Expert at reading reset schematic and blueprints helding a perfect record in assembling structure causes specifications. Holds at Certified Welder's status sets the AWS. EMPLOYMENT HISTORY Jan 2020 — Present Marine Welder, Gulf Coast Shipping Yards Marine Welder, Gulf Coast Shipping Yards Ausreled the 2019 Welding Excellence award for the entire group of companies Interpret designs, monitor machinery, and pre-assess components to be welded Identify, locate and prepare Practices and tools before performing welding operations Repair standard and non-standard flaws in sheet metal components Use gauges and drawings to ensure compliance with quality and safety specifications Perform welding with close tolerance to finishing requirements of standardized parts Op ore-assessments and post-inspections on all welded parts Cutting of new tools and fixtures with high specialized welding and cutting machinery Welder, International Shutdown Services Worked on an Industrial Shutdown Services Worked on an Industrial Shutdown Project and finished all cutting, welding and brazing tasks six weeks she schedule Interpret schematic CAD drawings and blueprints for mega steel structures in the construction ind Conduct appropriate fabrication and layout of items to ensure proper structuring of activities for evelling connection Use FCAW and MIG welding machines to fuse together aluminum and stainless steel pieces Test all welds to ensure stubility and decretiry Repair weakened steel structures and beauts with an Arc Welding machine May 2020 — May 2020 Adhieved a record of zero defects in all pipe-welding and ductuork jobs in the last 18 months Solder and braze stainless steel piping structures Make minor adjustment to finished parts to consure compliance with all regulations, making adjustment repairs as needed with SMAW welder Carefully impected all finished parts to consure complia	Nationality				
marine settor. Export at reading exeed selematics and blasgrints bolding a perfect record in assembling struct to exact specifications. Holds a Certified Welder's status via the AWS. EMPLOYMENT HISTORY Jan 2020 — Present Marine Welder, Gulf Coast Shipping Yards Awarded the 2019 Welding Excellence award for the entire group of companies Interpret designs, monitor machinery, and pre-assess components to be welded Identify, locate and prepare fixtures and tools before performing welding operations Repair standard and non-standard flaws in sheet metal components Use gauges and drawings to ensure compliance with quality and stery specifications Perform welding with close tolerance to finishing requirements of standardized parts Do pre-assessments and post-inspections on all welded parts Cutting of new tools and fixtures with high specialized welding and cutting machinery Jan 2018 — Dec 2019 Welder, International Shutdown Services Nap Worked on an Industrial Shutdown Project and finished all cutting, welding and brazing tasks six weeks also skeladie Interpret schematic CAD drawings and blueprints for mega steel structures in the construction ind Conduct appropriate fabrication and layout of items to ensure proper structuring of activities for evelding connection Use FCAW and MIG welding machines to fuse together aluminum and stainless steel pieces Test all welds to ensure stubility and destertity Repair weakened steel structures and beams with an Arc Welding machine May 2020 — May 2020 Achieved a record of zero defects in all pipe welding and ductuwrk jobs in the last 18 months Solder and braze stainless steel piping structures Alax minor adjustments to finished parts to conform to the safety and regulations, making adjustment repairs as needed with SMAW welder Nationals, repair and santitive all welding machinery and cutting tools Weld and join components in vertical, horizontal and overhead positions EDUCATION Jan 2017 — Jul 2017 CNC Machine Tool Operator Certificate , Lincoln Tech Met	LINKS	Instagram, Twitter			
Marine Welder, Gulf Coast Shipping Yards	PROFILE	Welltenured Arc Welder with five years experience in fabricating quality metal components for the shipping and marine sector. Expert at reading vessel schematics and blueprints holding a perfect record in assembling structures to exact specifications. Holds a Certified Welder's status via the AWS.			
Awarded the 2019 Welding Excellence award for the entire group of companies Interpret designs, monitor machinery, and pre-assess components to be welded Identify, locate and prepare fixtures and tools before performing welding operations Repair standard and non-standard flaws in sheet metal components Use gauges and drawings to ensure compliance with quality and safety specifications Perform welding with close tolerance to finishing requirements of standardized parts Do pre-assessments and post-inspections on all welded parts Cutting of new tools and fixtures with high specialized welding and cutting machinery Welder, International Shutdown Services Nap Worked on an Industrial Shutdown Project and finished all cutting, welding and brazing tasks six weeks ah schedule Interpret schematic CAD drawings and blueprints for mega steel structures in the construction in Conduct appropriate fabrication and layout of items to ensure proper structuring of activities for e welding connection Use FCAW and MIG welding machines to fuse together aluminum and stainless steel pieces Test all welds to ensure stability and dexterity Repair weakened steel structures and beams with an Arc Welding machine May 2020 — May 2020 Achieved a record of zero defects in all pipe-welding and ductwork jobs in the last 18 months Solder and braze stainless steel piping structures Make minor adjustment to finished parts to conform to the safety and regulatory specifications Carefully inspected all finished parts to conform to the safety and regulatory specifications Amalian, repair and santize all welding machinery and cutting tools Weld and join components in vertical, horizontal and overhead positions EDUCATION Jan 2017 — Jul 2017 CNC Machine Tool Operator Certificate , Lincoln Tech Associate of Applied Science in Welding Technology, Coral Springs University Course Curriculum: Metallurgy, Design, Schematics, Materials Science, Materials Processing	EMPLOYMENT HISTORY				
Interpret designs, monitor machinery, and pre-assess components to be welded Identify, locate and prepare fixtures and tools before performing welding operations Repair standard and non-standard flaws in sheet metal components Use gauges and drawings to ensure compliance with quality and safety specifications Perform welding with close tolerance to finishing requirements of standardized parts Do pre-assessments and post-abspections on all welded parts Cutting of new tools and fixtures with high specialized welding and cutting machinery Welder, International Shutdown Services Nap Worked on an Industrial Shutdown Project and finished all cutting, welding and brazing tasks six weeks also schedule Interpret schematic CAD drawings and blueprints for mega steel structures in the construction ind Conduct appropriate fabrication and layout of items to ensure proper structuring of activities for evelding connection Use FCAW and MIG welding machines to fuse together aluminum and stainless steel pieces Test all welds to ensure stability and descript Repair weakened steel structures and beams with an Arc Welding machine May 2020 — May 2020 Achieved a record of zero defects in all pipe-welding and ductwork jobs in the last 18 months Solder and braze stainless steel piping structures Make minor adjustments to finished parts to conform to the safety and regulatory specifications Carefully inspected all finished parts to conform to the safety and regulatory specifications Carefully inspected all finished parts to conform to the safety and regulatory, specifications Weld and join components in vertical, horizontal and overhead positions EDUCATION Jan 2017 — Jul 2017 CNC Machine Tool Operator Certificate , Lincoln Tech In Associate of Applied Science in Welding Technology, Coral Springs University Course Curriculum: Metallurgy, Design, Schematics, Materials Science, Materials Processing	Jan 2020 — Present	Marine Welder, Gulf Coast Shipping Yards	West Molesey		
Identify, locate and prepare fixtures and tools before performing welding operations Repair standard and non-standard flaws in sheet metal components Use gauges and drawings to ensure compliance with quality and safety specifications Perform welding with close tolerance to finishing requirements of standardized parts Do pre-assessments and post-inspections on all welded parts Cutting of new tools and fixtures with high specialized welding and cutting machinery Welder, International Shutdown Services Nap		Awarded the 2019 Welding Excellence award for the entire group of companies			
Worked on an Industrial Shutdown project and finished all cutting, welding and brazing tasks six weeks also schedule Interpret schematic CAD drawings and blueprints for mega steel structures in the construction ind Conduct appropriate fabrication and layout of items to ensure proper structuring of activities for ewelding connection Use FCAW and MIG welding machines to fuse together aluminum and stainless steel pieces Test all welds to ensure stability and dexterity Repair weakened steel structures and beams with an Arc Welding machine May 2020 — May 2020 Achieved a record of zero defects in all pipe-welding and ductwork jobs in the last 18 months Solder and braze stainless steel piping structures Make minor adjustments to finished parts to conform to the safety and regulatory specifications Carefully inspected all finished parts to ensure compliance with all regulations, making adjustment repairs as needed with SMAW welder Maintain, repair and sanitize all welding machinery and cutting tools Weld and join components in vertical, horizontal and overhead positions EDUCATION Jan 2017 — Jul 2017 CNC Machine Tool Operator Certificate , Lincoln Tech Associate of Applied Science in Welding Technology, Coral Springs University Course Curriculum: Metallurgy, Design, Schematics, Materials Science, Materials Processing		 Identify, locate and prepare fixtures and tools before performing welding operations Repair standard and non-standard flaws in sheet metal components Use gauges and drawings to ensure compliance with quality and safety specifications Perform welding with close tolerance to finishing requirements of standardized parts Do pre-assessments and post-inspections on all welded parts 			
Interpret schematic CAD drawings and blueprints for mega steel structures in the construction ind Conduct appropriate fabrication and layout of items to ensure proper structuring of activities for e welding connection Use FCAW and MIG welding machines to fuse together aluminum and stainless steel pieces Test all welds to ensure stability and dexterity Repair weakened steel structures and beams with an Arc Welding machine May 2020 — May 2020 Achieved a record of zero defects in all pipe-welding and ductwork jobs in the last 18 months Solder and braze stainless steel piping structures Make minor adjustments to finished parts to conform to the safety and regulatory specifications Carefully inspected all finished parts to ensure compliance with all regulations, making adjustment repairs as needed with SMAW welder Maintain, repair and sanitize all welding machinery and cutting tools Weld and join components in vertical, horizontal and overhead positions EDUCATION Jan 2017 — Jul 2017 CNC Machine Tool Operator Certificate, Lincoln Tech Associate of Applied Science in Welding Technology, Coral Springs University Course Curriculum: Metallurgy, Design, Schematics, Materials Science, Materials Processing	Jan 2018 — Dec 2019	Welder, International Shutdown Services	Naperville		
Conduct appropriate fabrication and layout of items to ensure proper structuring of activities for e welding connection Use FCAW and MIG welding machines to fuse together aluminum and stainless steel pieces Test all welds to ensure stability and dexterity Repair weakened steel structures and beams with an Arc Welding machine May 2020 — May 2020 Achieved a record of zero defects in all pipe-welding and ductwork jobs in the last 18 months Solder and braze stainless steel piping structures Make minor adjustments to finished parts to conform to the safety and regulatory specifications Carefully inspected all finished parts to ensure compliance with all regulations, making adjustment repairs as needed with SMAW welder Maintain, repair and sanitize all welding machinery and cutting tools Weld and join components in vertical, horizontal and overhead positions EDUCATION Jan 2017 — Jul 2017 CNC Machine Tool Operator Certificate, Lincoln Tech Associate of Applied Science in Welding Technology, Coral Springs University Course Curriculum: Metallurgy, Design, Schematics, Materials Science, Materials Processing		Worked on an Industrial Shutdown project and finished all cutting, welding and brazing tasks six weeks ahead of schedule			
Solder and braze stainless steel piping structures Make minor adjustments to finished parts to conform to the safety and regulatory specifications Carefully inspected all finished parts to ensure compliance with all regulations, making adjustment repairs as needed with SMAW welder Maintain, repair and sanitize all welding machinery and cutting tools Weld and join components in vertical, horizontal and overhead positions EDUCATION Jan 2017 — Jul 2017 CNC Machine Tool Operator Certificate, Lincoln Tech Jan 2016 — Dec 2017 Associate of Applied Science in Welding Technology, Coral Springs University Course Curriculum: Metallurgy, Design, Schematics, Materials Science, Materials Processing		 Conduct appropriate fabrication and layout of items to ensure proper structuring of welding connection Use FCAW and MIG welding machines to fuse together aluminum and stainless stee Test all welds to ensure stability and dexterity 	activities for each		
 Make minor adjustments to finished parts to conform to the safety and regulatory specifications Carefully inspected all finished parts to ensure compliance with all regulations, making adjustment repairs as needed with SMAW welder Maintain, repair and sanitize all welding machinery and cutting tools Weld and join components in vertical, horizontal and overhead positions EDUCATION Jan 2017 — Jul 2017 CNC Machine Tool Operator Certificate, Lincoln Tech Associate of Applied Science in Welding Technology, Coral Springs University Course Curriculum: Metallurgy, Design, Schematics, Materials Science, Materials Processing	May 2020 — May 2020	Achieved a record of zero defects in all pipe-welding and ductwork jobs in the last 18 months			
Jan 2017 — Jul 2017 CNC Machine Tool Operator Certificate, Lincoln Tech Jan 2016 — Dec 2017 Associate of Applied Science in Welding Technology, Coral Springs University Course Curriculum: Metallurgy, Design, Schematics, Materials Science, Materials Processing		 Make minor adjustments to finished parts to conform to the safety and regulatory sp Carefully inspected all finished parts to ensure compliance with all regulations, making repairs as needed with SMAW welder Maintain, repair and sanitize all welding machinery and cutting tools 			
Jan 2016 — Dec 2017 Associate of Applied Science in Welding Technology, Coral Springs University Course Curriculum: Metallurgy, Design, Schematics, Materials Science, Materials Processing	EDUCATION				
University Course Curriculum: Metallurgy, Design, Schematics, Materials Science, Materials Processing	Jan 2017 — Jul 2017	CNC Machine Tool Operator Certificate , Lincoln Tech	Denve		
Metallurgy, Design, Schematics, Materials Science, Materials Processing	Jan 2016 — Dec 2017	11 8 87 1 8			
		Course Curriculum:			
Jan 2015 — May 2015 Certified Welder,, American Welding Society		Metallurgy, Design, Schematics, Materials Science, Materials Processing			
	Jan 2015 — May 2015	Certified Welder,, American Welding Society	Dora		
May 2020 — May 2020 Certified Underwater Welder, American Welding Society	May 2020 — May 2020	Certified Underwater Welder, American Welding Society	Dora		

SKILLS	Calculating Dimensions	Experienced	Robotic Welding Equipment	Skillful
	Interpreting Sketches	Experienced	Grinders	Skillful
	Cutting and Trimming	Experienced	Soldering Iron	Skillful
	Molten Metal Flows	Experienced	Brazing Torch	Skillful
	Identifying Joints	Experienced	FCAW	Beginner
	Part and Material Inspection	Experienced	MIG	Beginner
	Safety Standards	Experienced	SMAW	Beginner
	D and 3-D Diagrams	Experienced	Weldshop	Novice
	Fixtures	Experienced	TIG	Novice
	Arc Welding	Novice	SmartDraw	Novice
	Fillet and Butt Weld Gauges	Skillful	MITCalc	Novice
	Lifting and Control Devices	Skillful	Welded Connections	Novice
	Metal Finishers	Skillful		

COURSES

Feb 2016 — Jun 2017 Certified Commercial Diver, American Red Cross, Washington

DC

Jan 2015 — Nov 2015 Advanced First Aid Certificate, American Red Cross, Orlando, FL
