PROFILE

Reliable Field Technician that can carry out the latest techniques to capture field data required for projects. Known for being competent when using and calibrating complicated equipment, being willing to work in ranging conditions, and understanding that overnight travel and work can often be required. Enjoys teamwork, specifically with a group that gets positive results from projects.

EMPLOYMENT HISTORY

Field Service Technician, ABC Facilities Management

Jan 2020 — Present, Fatsa

Developed a system that made pulling up accounts a more seamless process, saving 2-5 minutes per customer.

- Create daily service reports from projects
- Follow the company's orders
- Demonstrate skilled usage of equipment
- Troubleshooting customer problems
- Attend to all daily appointments
- Respond swiftly to customer queries
- Provide consultations for clients
- Give accurate equipment recommendations
- Offer service and customer assistance during site visits
- Stay organized
- Oversee all on-site installation, repair, and maintenance projects
- Identify faults or technical problems and find solutions

Field Service Technician, Goldish Electronics

Jan 2017 — Jan 2018, Wayne

Finished top 10% in Valley Technical Service Seminar in the country, gaining the Service Specialist title. This title helped our company obtain service parts at a discount from Valley's warehouse.

Effectively maintained customer service relationships and copiers in 6 different locations.

- Document all technical procedures
- Treat the company vehicle with caution and respect
- Follow organizational processes and protocols
- Follow up with the technical crew
- Predict customer needs and make helpful suggestions
- Build strong working relationships with customers
- Perform cabling, wiring, and basic routing skills
- Have an in-depth understanding of high and low-density fiber optical systems as well as copper and RF transport devices
- Implementation of secondary power distribution devices and fusing projects.
- Configuration, fixing, and data routing of switching mechanisms.
- Plan and prepare documents for the various systems
- Ensure the proper classification of all tools

Junior Technician, Kellogs

Jan 2015 — Dec 2016, Qarqin

Software configuration for controller I/O and interfacing of high-speed labelers, printers, and magnetic encoding on transport belts at 27,000 to 29,000 PC's per hour

- Physical tasks include grasping, lifting, carrying, walking, seeing, hand-eye coordination, writing, speaking, and listening.
- Mental tasks include interpreting, analyzing, measuring, calculating, communicating, and reading.
- Being competent with lubrication, adjusting, aligning, calibrating, assembling, inspecting, and testing of food prep equipment
- Act as a safety role model, ensuring that others complete tasks safely and intervening when people are unsafe
- Perform administrative functions, such as writing procedural reports, ordering of materials, securing quotations, and filing/archiving data and documents
- Identifying and tracking any issues with an account and then taking steps to reach a resolution
- Installing, commissioning, servicing, and maintaining product lines following company guidelines and instructions
